

# Mayku Environmental Promise

---

## Mission Statement

At Mayku we're working towards a sustainable future. Where people have the power to create, not just consume. We consider the environmental impact of every product we make as well as the materials that work with them.

That's why Mayku Sheets are made out of as much recycled content as possible without compromising quality.

We've also ensured that they're fully recyclable - so you can put them in your regular household recycling bin.

In our labs we're developing fully compostable plant based plastics, exploring algae as a feedstock for our sheets and looking into how to turn your waste material back into useful sheets.

More than a machines company Mayku is a community of Makers. And we need you - the Mayku Makers to join us in creating a sustainable future.

Have you discovered any exciting new materials? Have you found a creative use for your sheet leftovers? We want to hear from you.

So get in touch and share what you're making - [hello@mayku.me](mailto:hello@mayku.me)

Together we can build a more sustainable future.

### Mayku Environmental Promise

Mayku Sheets are partly made from old plastic bottles and other recycled plastic items.

Fully recyclable in your home recycling.

## **Flyer**

- Mission statement slightly tweaked to be 2nd person.
- Make references to 'your FormBox'

## **Email to customers**

- Summary of the mission statement announcing what we're doing with a call to action for ideas and thoughts.

## **FAQ**

Can I recycle my Mayku sheets?

- Yes they can go into your regular recycling bin.
- We suggest cutting them up to save space.
- You can also cut up the left over plastic and sprinkle into your Mayku Pour to add a bit of flair to your casting projects.
- Found a clever way to reuse and recycle? Send them to us we want to see.
